VESDA is the World's No. 1 Brand of Aspirating Smoke Detection

VESDA very early warning smoke detection solutions provide the earliest possible warning of an impeding fire hazard. VESDA buys time to investigate an alarm and initiate an appropriate response to prevent injury, property damage or business disruption. And because VESDA has the industry's widest sensitivity range and multi-level alarms, even minute levels of smoke can be detected before a fire has time to escalate.

It is important your fire alarm installation and service technicians are familiar with VESDA and know how to configure each unit.

Get Accredited!

This two day course will provide the fundamentals required for designing, maintaining and commissioning VESDA Smoke Detection Systems.

This course is aimed at:
• Fire Service and Maintenance Technicians
• Fire Contractors

Training Outcomes:
• Increase your product knowledge
• Improve system design & maintenance
• Improve service, maintenance and troubleshooting
• Accreditation Certificate
